SIGNORINO

1006

Revered and adored universally for its style, durability and adaptability to any architectural intention, terrazzo is a composite material consisting of chips of natural stone set in cement, making it an entirely natural and sustainable product. In addition to a wide variety of superior quality terrazzo tile, Signorino offers a stunning collection of terrazzo slabs – ideal for adding the same signature aesthetic in large format, ideal for benchtops and vanities.

Our 30mm thick terrazzo slabs can be produced in three signature finishes: Polished, Honed and Brushed for a textured appeal.
